### **OUR MISSION**

Utilizing highly innovative testing equipment and strategies, we aim to evaluate and train athletes and non-athletes in achieving PEAK VISUAL PERFORMANCE. Skills assessed and developed include:

Static and Dynamic Visual Acuity      Peripheral Vision      Depth Perception  
Eye Motility      Eye/Hand/Body/Foot Coordination      Speed of Recognition  
Speed of Focusing      Visual Memory      Spatial Localization      Concentration

### **BENEFITS**

Our training is designed to improve performance, whether athletic or non-athletic; and at all ages. There is very little that we all do on a daily basis that doesn't involve our visual system. Improved visual performance leads to greater athletic success and overall daily activities of living.

### **OUR PROGRAM**

After a comprehensive evaluation of visual performance skills, strengths and weaknesses are addressed over a 7 week training program. Individuals are provided tools for home training between sessions. A post-training evaluation and summary is provided upon conclusion of program.

### **FACILITY**

Approximately 2,400 Sq. Ft. brand new facility with the latest testing and training equipment; 2 batting/pitching cage; Astroturf throughout, located in Anderson, IN

### **OUR TRAINING**

Our doctors and staff have received training from world renowned experts in Visual Performance and directly worked with NFL, MLB, NASCAR, LPGA, Trap Shooters, and other collegiate and amateur level athletes.

### **HOURS OF OPERATION**

We have flexible day, evening, and weekend hours of availability. Please email us with your requests and we will attempt to accommodate.
