

PREVENTATIVE IMAGING

Which office are you visiting?*

First Name*

Last Name*

Macha Eye Care offers an elective, preventative imaging technology. This is highly advised by all the doctors of Macha Eye Care.

RETINAL IMAGING AIDS IN:

1. Detection of ocular disease and abnormalities much faster
2. Detection of stroke, diabetes, some forms of cancer
3. Comparing subtle changes in your eyes from past exams

Retinal Imaging is quick, painless, comfortable, and safe. Nothing touches your eye. It is suitable for all ages. This also does NOT replace dilation, rather complements a dilated fundus eye exam.

Insurance does NOT cover this preventative screening in most cases.

Our nominal fee is \$39.

Yes, I accept the doctors' recommendation to have my preventative imaging completed today

No, I do not wish to have my preventative imaging completed today
